

COMPROMISE ASSESSMENT (CA)

FAST | ACCURATE | SIMPLE | THOROUGH

F

Our lightweight agent continuously detects, eradicates and remediates issues, drastically reducing your MTTD and MTTR to prevent security incidents from evolving into business-altering events—all provided by the collaboration between our expert analysts, virtual forensic analyst AI and our attacker behavior modeling technology.

A

We provide automated forensic analyses not just across multiple levels of contexts but also into the intricate relationships between each of those levels of context.

S

Receive regular in-depth reports on the current state of your entire network. Cybots AMDR Services Team is available to walk you through your fully-actionable reports step by step, explaining each step simply and clearly.

T

We rescan and confirm eradication with cyber threat intel from multiple major proprietary sources and organizations across the globe, as well as the rigorous AI-driven vetting process of our Cyber Threat Intelligence.

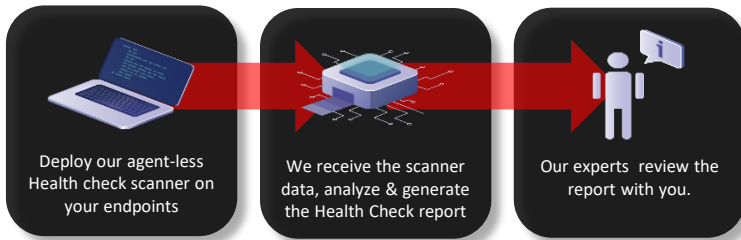

COMPROMISE ASSESSMENT ICAI

Are you certain that you haven't been compromised?

You will receive a highly detailed and accurate Compromise Assessment report within 1 day of our agent-less scanner runs. This comes via the seamless collaboration of our expert team of analysts, our virtual forensic analyst AI and attacker behavior modelling technology.

Our Approach - Step 1 and Final step

Install lightweight Agents on all workstation and servers

Our Deliverables

- Complete report on site-wide analysis of risk and exposures
- Highlight security hygiene issues and suspicious behavior analysis
- Step by step guidance to enhance your ability to rapidly and effectively respond to future security incidents

Cybots Compromise Assessment vs Other Cyber Security Assessments

| | CYBOTS Compromise Assessment | Red Team Assessment | Pen Test Assessment | SIEM |
|----------------------------|---|--------------------------------|--------------------------------|-----------------------------|
| Time to Analyze | <1 day | Months | Weeks | Days |
| Type of Result | Full System Security Health Report | Can Uncover Vulnerability | Only On Areas Tested | Raw Data From Log Collected |
| Value to Your Organization | High | Medium | Medium | Medium |
| Ease of Actionability | Easy | Hard | Moderate | Easy |

Consult our cybersecurity experts today!

The Cybots team is here to be your cybersecurity partner, whether it's the Initial Assessment, Managed Services or Cybersecurity Products.

THE CYBOTS DIFFERENCE

Cybots Compromise Assessment

Rapidly Identify Adversarial Activity Or Malicious Logic

- Holistic monitoring of cyber threats to your IT environment
- Assess the environment for any internal vulnerabilities that may already exist in the system
- Identifies any potential external exploits
- Eliminates more than 90% of “false positives”
- Benefits of “AI” which is thorough and not prone to fatigue
- Increase compliance

| Product Features | CA |
|---|--|
| Scans every endpoint, process, file | Yes |
| IAM (Identity Access Management) across entire network | Yes |
| Automated investigations triggered upon detection of a high severity alert (level 7 – 10) | Yes |
| Full site-wide forensic analysis by AI | Yes |
| Additional analysis by human security analysts | No |
| Link each step of the attack | Yes |
| Provide full context for each step of the attack | Yes |
| Report that informs which processes to stop | Yes |
| Identify files to delete | Yes |
| Identify Malware to remove | Yes |
| List of infected user accounts | Yes |
| List of URLs, IP addresses, domains to block | Yes |
| Threat Hunting Alerts | |
| Detection time for cyber threat | NA |
| Cyber Situation Reports* | |
| Auto Generated Actionable Report | Yes |
| Generation time for Cyber Situation Report | within 1 week |
| Full storylines of any & all malicious activity | Yes |
| Malicious domain, IP, URL analysis | Yes |
| Malware analysis | Yes |
| Graphs of all affected nodes and executions | Yes |
| Step-by-step plan for eradication & more | Yes |
| Eradication confirmation | Yes |
| Analyst Recommendation & Interpretation on report | Explanation provided |
| Sample Report | Asset Analysis Report Cyber Situation Report (AI) |

*action report only available when cyber situation arises
